ULE Project No.: 4789366929

ULE Order No.: 13226395

Subject: Environmental Claims Validation for Air Ionizer 7000 Series, Air Ionizer PA600 Series, Plasma BAR Series Ionizer Bar with Plasma Bar Control Panel

Dear Vincent and Larry,

Congratulations! All testing, auditing and analysis work associated with the above project number has been completed. Please refer to the following page for all environmental claims validated and the methods used for validation. The products listed in this report are eligible to bear the ULE Environmental Claims Validation Logo, in accordance with the ECV Guidelines.

Please be informed that in some cases, UL Environment Inc. didn't select the samples. Auditing conducted to validate environmental claims was performed on a sample of available documentation, products and materials.

The issuance of this report in no way implies ULE Sustainable Product Certification, ULE Environmental Product Declaration, Underwriters Laboratories Inc. (UL) Product Safety Listing, Classification or Recognition and does not authorize the use of ULE certification marks or UL Safety Listing, Classification or Recognition Marks or any other reference to UL on or in connection with the safety of the product or system. This letter is solely intended to report the environmental claims that were found to be valid and the methods used by ULE to validate such claims. Any modifications to electrical components, mechanical components, materials, manufacturing processes, purchasing policies or other items, which may affect the environmental claims validated, may invalidate the claims and require full reassessment.

We appreciate the opportunity to have worked with you on this project. Should you have any questions regarding this letter or the attachments, please let us know.

Sincerely,

*Sabrina Wong*

Environmental Project Manager  
UL Environment

## Proposed Test Schedule

ULE conducts testing on a three year cycle, provided there have been no major changes that would affect the test results within the three year period. Major changes include, but are not limited to product reformulation, manufacturing process changes, relocation of manufacturing facility, etc. Your Environmental Project Manager (EPM) will also reserve the right to request more frequent re-testing at an additional cost should s/he feel it is necessary; however, these decisions will be made on a case-by-case basis and only after careful consideration.

Product Name	Test Name	Last Test Date	Re-Test Date
Air Ionizer 7000	UL 867 Section 40	July 28, 2020	September 2023
Air Ionizer PA600	UL 867 Section 40	July 29, 2020	September 2023
Plasma BAR with Plasma Bar Control Panel	UL 867 Section 40	September 30, 2020	September 2023

## Annual Review - Purpose and Objectives

Upon completion of your Environmental Claims Validation (ECV) project, each year you will complete an annual review of your products and environmental claims. The purpose of the annual review is to ensure your products continue to be in compliance with the environmental claims that were issued.

## Annual Review Activities

Your annual review will consist of the following activities during which we will work together to bring your renewal services to completion.

- Your team will complete an annual review declaration provided by UL Environment, which will be used to identify any product, manufacturing and/or quality system changes during the past year.
- Review new products developed within the past year in addition to reviewing the product spec sheets and production records.
- Review claim wording and make any necessary modifications based on new guidance such as the US Federal Trade Commission 16 CRF Part 260 (Green Guides) revisions and other pertinent environmental claim regulations.
- Complete an on-site audit of your manufacturing location (if necessary).
- Complete testing per UL 867 (if necessary).
- Upon completion of the annual review, an updated report will be posted on the UL Environment database to show an annual review was completed.

## Scope of Annual Review

- **Validated Product(s):** Air Ionizer 7000 Series, Air Ionizer PA600 Series, Plasma BAR Series Ionizer Bar with Plasma Bar Control Panel
- **Services Performed:** Environmental Claim Validation to validate UL ECVP 2998 Zero Ozone Emissions from Air Cleaners, 3rd edition - 2020
